Chloroethyl acetate			X	Methyl ethyl ketone			X	Sulphurous acid, to 5%	X		
Chlorophenol			X	Methylated spirits			X	Sulphuryl chloride	X		
Chromic acid		X		Milk of lime	X			Tartaric acid, to 50%	X		
Citric acid, to 20%	X			Monobromonaphthalene	X			Thionyl chloride			X
Copper sulphate	X			Motor fuel, benzene-free	X			Toluene			X
Cresol			X	Motor fuel, with benzene			X	Triethylamine	X		
Cyclohexane	X			Nickel sulphate	X			Trichloroacetic acid			X
Diacetone alcohol			X	Nitric acid, to 20%	X			Tricresyl phosphate	X		
Diamyl phthalate		X		Nitric acid, 20-70%			X	Turpentine			X
Dibutyl phthalate			X	Nitric acid, over 70%			X	Turpentine substitute			X
Diethylene glycol	X			Oxalic acid	X			Urea, to 20%	X		
Dioxane			X	Paraffin			X	Xylene			X
Ether			X	Perchloroethylene			X	Zinc sulphate, aqueous			X
Ethyl acetate			X	Petroleum ether	X			Zinc sulphate, solid	X		
				Phenols			X				

Testing is based on ASTM D 1308-98, Standard Test Method for Effect of Household Chemicals on Clear and Pigmented Organic Finishes. Chemicals were tested on stress-free flat panels at room temperature.

ACRYLITE® is Not Resistant (NR) if the chemical caused any objectionable alteration in the surface, such as discoloration, change in gloss, blistering, softening, swelling, loss of adhesion, or special phenomena.

ACRYLITE® is Resistant (R) if no objectionable alteration occurred.

ACRYLITE® has Limited-Resistance (LR) if there was a temporary effect that could be removed upon further cleaning of the specimen.

The information on this chart can be used for ACRYLITE® extruded and ACRYLITE® cast sheet. ACRYLITE® extruded sheet is dissolved faster by solvents than ACRYLITE® cast sheet. All information is based on 72°F (23°C) test temperature and stress free material. The practical performance depends on usage temperatures and actual stresses. If you are not sure about your application, please call Roehm America LLC's Technical Service Department.

Röhm GmbH and its affiliates are a worldwide manufacturer of PMMA products sold under the PLEXIGLAS® trademark on the European, Asian, African and Australian continents and under the ACRYLITE® trademark in the Americas.

#### Fire Precautions

ACRYLITE® sheet is a combustible thermoplastic. Precautions should be taken to protect this material from flames and high heat sources. ACRYLITE® sheet usually burns rapidly to completion if not extinguished. The products of combustion, if sufficient air is present, are carbon dioxide and water. However, in many fires sufficient air will not be available and toxic carbon monoxide will be formed, as it will when other common combustible materials are burned. We urge good judgement in the use of this versatile material and recommend that building codes be followed carefully to assure it is used properly.

#### Compatibility

Like other plastic materials, ACRYLITE® sheet is subject to crazing, cracking or discoloration if brought into contact with incompatible materials. These materials may include cleaners, polishes, adhesives, sealants, gasketing or packaging materials, cutting emulsions, etc. See the Tech Briefs in this series for more information, or contact your ACRYLITE® sheet Distributor for information on a specific product.

This information and all further technical advice is based on our present knowledge and experience. However, it implies no liability or other legal responsibility on our part, including with regard to existing third party intellectual property rights, especially patent rights. In particular, no warranty, whether expressed or implied, or guarantee of product properties in the legal sense is intended or implied. We reserve the right to make any changes according to technical progress or further developments. The customer is not released from the obligation to conduct careful inspection and testing of incoming goods. Performance of the product described herein should be verified by testing, which should be carried out only by qualified experts in the sole responsibility of a customer. Reference to trade names used by other companies is neither a recommendation, nor does it imply that similar products should be used.
